

# SDG 12: SUSTAINABLE PRODUCTION AND CONSUMPTION

- The University is committed to implementing ethical sourcing practices for food and supplies.
- The University is committed to the safe and responsible management of hazardous waste by applying best practices for disposal in accordance with approved environmental standards.
- The University is committed to promote environmental sustainability by developing waste management methods and supporting recycling on campus.
- The University is committed to reducing the consumption of plastic and non-biodegradable items across all its facilities and departments.
- The University is committed to reducing the use of disposable items on campus by adopting sustainable alternatives and promoting the use of reusable products.

## Ethical Sourcing of Food and Supplies Policy

Ensure suppliers comply with ethical sourcing and social responsibility standards.

Enhance transparency and accountability in the sourcing of food and supplies

Reduce environmental and negative impacts by supporting suppliers who follow sustainable practices.

Encourage suppliers to improve their environmental and social practices.

## Hazardous Waste Management Policy

Ensure the safe and sustainable disposal of hazardous waste in compliance with environmental regulations.

Minimize the impact of hazardous waste on the environment and public health through effective and comprehensive management.

Raise awareness and promote proper practices among university staff and students regarding hazardous waste handling.

## Disposable Item Use Minimization Policy

Promote the use of reusable products on campus.

Increase awareness of the importance of consumption reduction and support sustainability awareness initiatives.

Reduce the volume of waste generated from disposable items.

## Plastic and Disposable Item Minimization Policy

Achieve an annual reduction in plastic consumption.

Increase awareness among students, faculty, and staff about the risks of plastic pollution and the importance of adopting sustainable alternatives.

Encourage the use of recyclable materials in various university activities.

## Recycled Waste Management and Measurement Policy

Reduce the amount of waste generated at the university by improving resource efficiency.

Increase the percentage of recycled waste relative to the total waste generated.

Decrease waste sent to landfills in line with sustainability goals.

## Seventeen SDG Scientific Research (2023)

Green Human Resources Management, Corporate Social Responsibility and Organizational Citizenship Behavior: A Conceptual Model

Potential energy production from organic waste and its environmental and economic impacts at a tertiary institution in Palestine

The feasibility of renewable energy recovery from municipal solid wastes in Palestine based on different scenarios
