STUDENTS SUSTAINABILITY CLUBS

Greenhouse Students club– A vibrant community for students passionate about the connection between people and nature. Members explore practical ways to reduce our use of natural resources and learn how to become catalysts for building a more sustainable society.

Palestinian tradition and heritage club– Established to share knowledge and insights about the rich cultural heritage of Palestine and Jordan, with a focus on historical traditions and preservation.

Young farmers club– A student-led initiative focused on urban agriculture, providing opportunities to grow food on campus while engaging both students and community members in hands-on learning experiences.

Environmental friendly club– Open to all students with a love for the environment. This club aims to raise awareness about environmental issues, empower students to take action on causes they care about, and promote community involvement through local sustainability projects.

Young go green club– Dedicated to raising awareness about environmental conservation and protection by organizing eco-friendly events and promoting sustainable practices.

Sustainability and food recycle club– Focused on educating students about sustainable food systems and encouraging environmentally conscious living.

Young sustainability club– A hub for professional development, education, and community engagement centered around the three pillars of sustainability: environmental stewardship, economic responsibility, and social equity.

Entrepreneur and innovation club: The Entrepreneur and Innovation Club fosters creativity, supports student startups, hosts workshops, connects members with industry experts, and organizes competitions to develop entrepreneurial skills and promote innovative thinking across campus.
